

Manuel Benitez

Web Developer

As a self-taught junior web developer with a passion for creating functional and visually appealing websites, I have completed a full stack bootcamp in web development, mastering key technologies such as React, Redux, CSS, HTML, and Node. Although I have no prior industry experience, my determination, and willingness to learn, combined with my technical proficiency, make me an ideal candidate for an entry-level position in web development.

Experience

● Full Stack Web App - Dogs App

jul. 2022 - ago. 2022 / Project

I designed and developed a dog App that included:
searches, filtering, ordering and creation

Front End: React, Redux, pure CSS

Back End: Node.js with Express. Data base on
PostgreSQL y Sequelize.

● Front End - Athens App

ago. 2022 - sep. 2022 / Project

We designed and developed an App for sports
products that included: searches, filtering, ordering,
creation, authentication with Auth0 and deployment
in Vercel, among others

Front End: React, Redux, CSS, Material UI, Styled
Components.

I designed the user experience in Figma and unified
styles and layouts throughout the page.

● Freelance Web Design with Wordpress

abr. 2020 - jun. 2020 / Freelance.com

Designed and deployed a single page app for a
small business located in the US, with domain and
hosting.

Negotiated with the client about the design and
utilities that were necessary

Tought the bussiness owner how to work with the
admin panel and update the sites info.
